Education

International Digital University (IDU) — Bachelor's Student, 4th Year
Major: Cybersecurity
Expected Graduation: 2026

Technical Skills

- Databases: PostgreSQL, SQL — schema design, normalization, complex queries, optimization.
- Programming: Python (Django, FastAPI, pandas), JavaScript.
- Web: HTML5, CSS3, Bootstrap., Tailwind.
- Tools: Git, Docker, Linux, Telegram API, Google Colab.
- Cybersecurity: SQL Injection & XSS protection, HTTPS protocols.
- WSL: Redis, Docker, Windows Server, Linux, Kali, Windows.
- Other: RESTful API design, backend logic, deployment basics, Cisko Packet Tracer.

Experience

Database Developer — Team Project In IDU
Web platform for electric car drivers to locate nearby charging stations.

- Designed and implemented PostgreSQL database from scratch.
- Optimized SQL queries and structured relationships for efficiency.
- Integrated database logic with backend using Python and Django.
- Collaborated in a small development team.

Backend Developer – Duo Project
Parser of OLX site, which could collect the data, filter and estimate real estate. Time of developing: 2 weeks

- **Database Architecture:** Designed and optimized a PostgreSQL database schema for storing and quickly filtering large amounts of real estate data.
- **Parser Development:** Implemented an efficient parser for the OLX platform in Python (using Playwright/BeautifulSoup), ensuring stable data collection without blocking.
- **Backend & API:** Developed server-side logic using FastAPI, implementing a filtering system and an algorithm for automatically estimating the value of properties based on market data.
- **UI/UX & Frontend:** Developed the application's (or bot's) interface, focusing on user-friendliness when configuring complex search filters.
- **Optimization:** Refactored the code structure, improving data processing performance and simplifying project maintenance.
- **Teamwork:** Successfully collaborated in a pair (Duo project), utilizing Git for version control and collaborative development.

Waiter at the Toretto Restaurant
I worked for 3 months, from early June to late August 2021.

- **Efficient guest service:** providing a high level of service in a high-traffic establishment.
- **Menu consultation:** helping guests choose dishes and drinks, knowledge of ingredients and cooking techniques (demonstrates the ability to memorize information quickly).
- **Handling objections:** Successfully resolving conflicts and maintaining a positive atmosphere.
- **Multitasking:** simultaneous service of multiple tables (4 to 6) while maintaining attention to detail.
- **Compliance with standards:** strict adherence to sanitary regulations and internal policies of the establishment.

Assembly and Installation Specialist (intern / temporary contract)
EPAM June - August 2019

- **Production and assembly:** Working in a workshop to manufacture window frames and structures; quality control of the assembly at each stage.
- **Installation work:** Participating in the installation and dismantling of window units and frames at the company's facilities.
- **Maintenance:** Working with professional tools and following the drawings/technical specifications.
- **Responsibility:** Adhering to the strict safety regulations and quality standards of a large international company.

Languages

- Russian — Native
- English — IELTS 7.0 (Upper-Intermediate)
- Japanese — JLPT N4–N3

Soft Skills

- Strong analytical thinking and problem-solving mindset
- Self-motivated learner
- Collaborative and responsible team member
- Excellent communication and adaptability

Career Interests

Full Stack Development
Backend Development
Database Engineering / Development

Data Analysis & Optimization

Looking for a company that values clean architecture, efficient database solutions, and data-driven decision-making. Passionate about improving performance and reliability in backend systems.
